What's Digital Manufacturing?

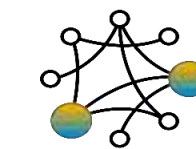

Industry 4.0 Key Enablers

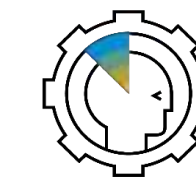

Design Thinking

Innovative, engaging methodology used to uncover the opportunities for your digital transformation

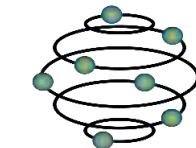

IoT

Connecting things with people and business

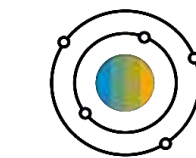

Machine Learning

Intelligence enabled by learning from data

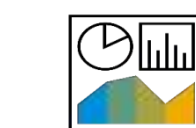

Big Data

Manage vast amounts of big data

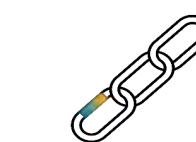

Data Intelligence

Data put into business context

Analytics

Insights that enable transformative actions

Blockchain

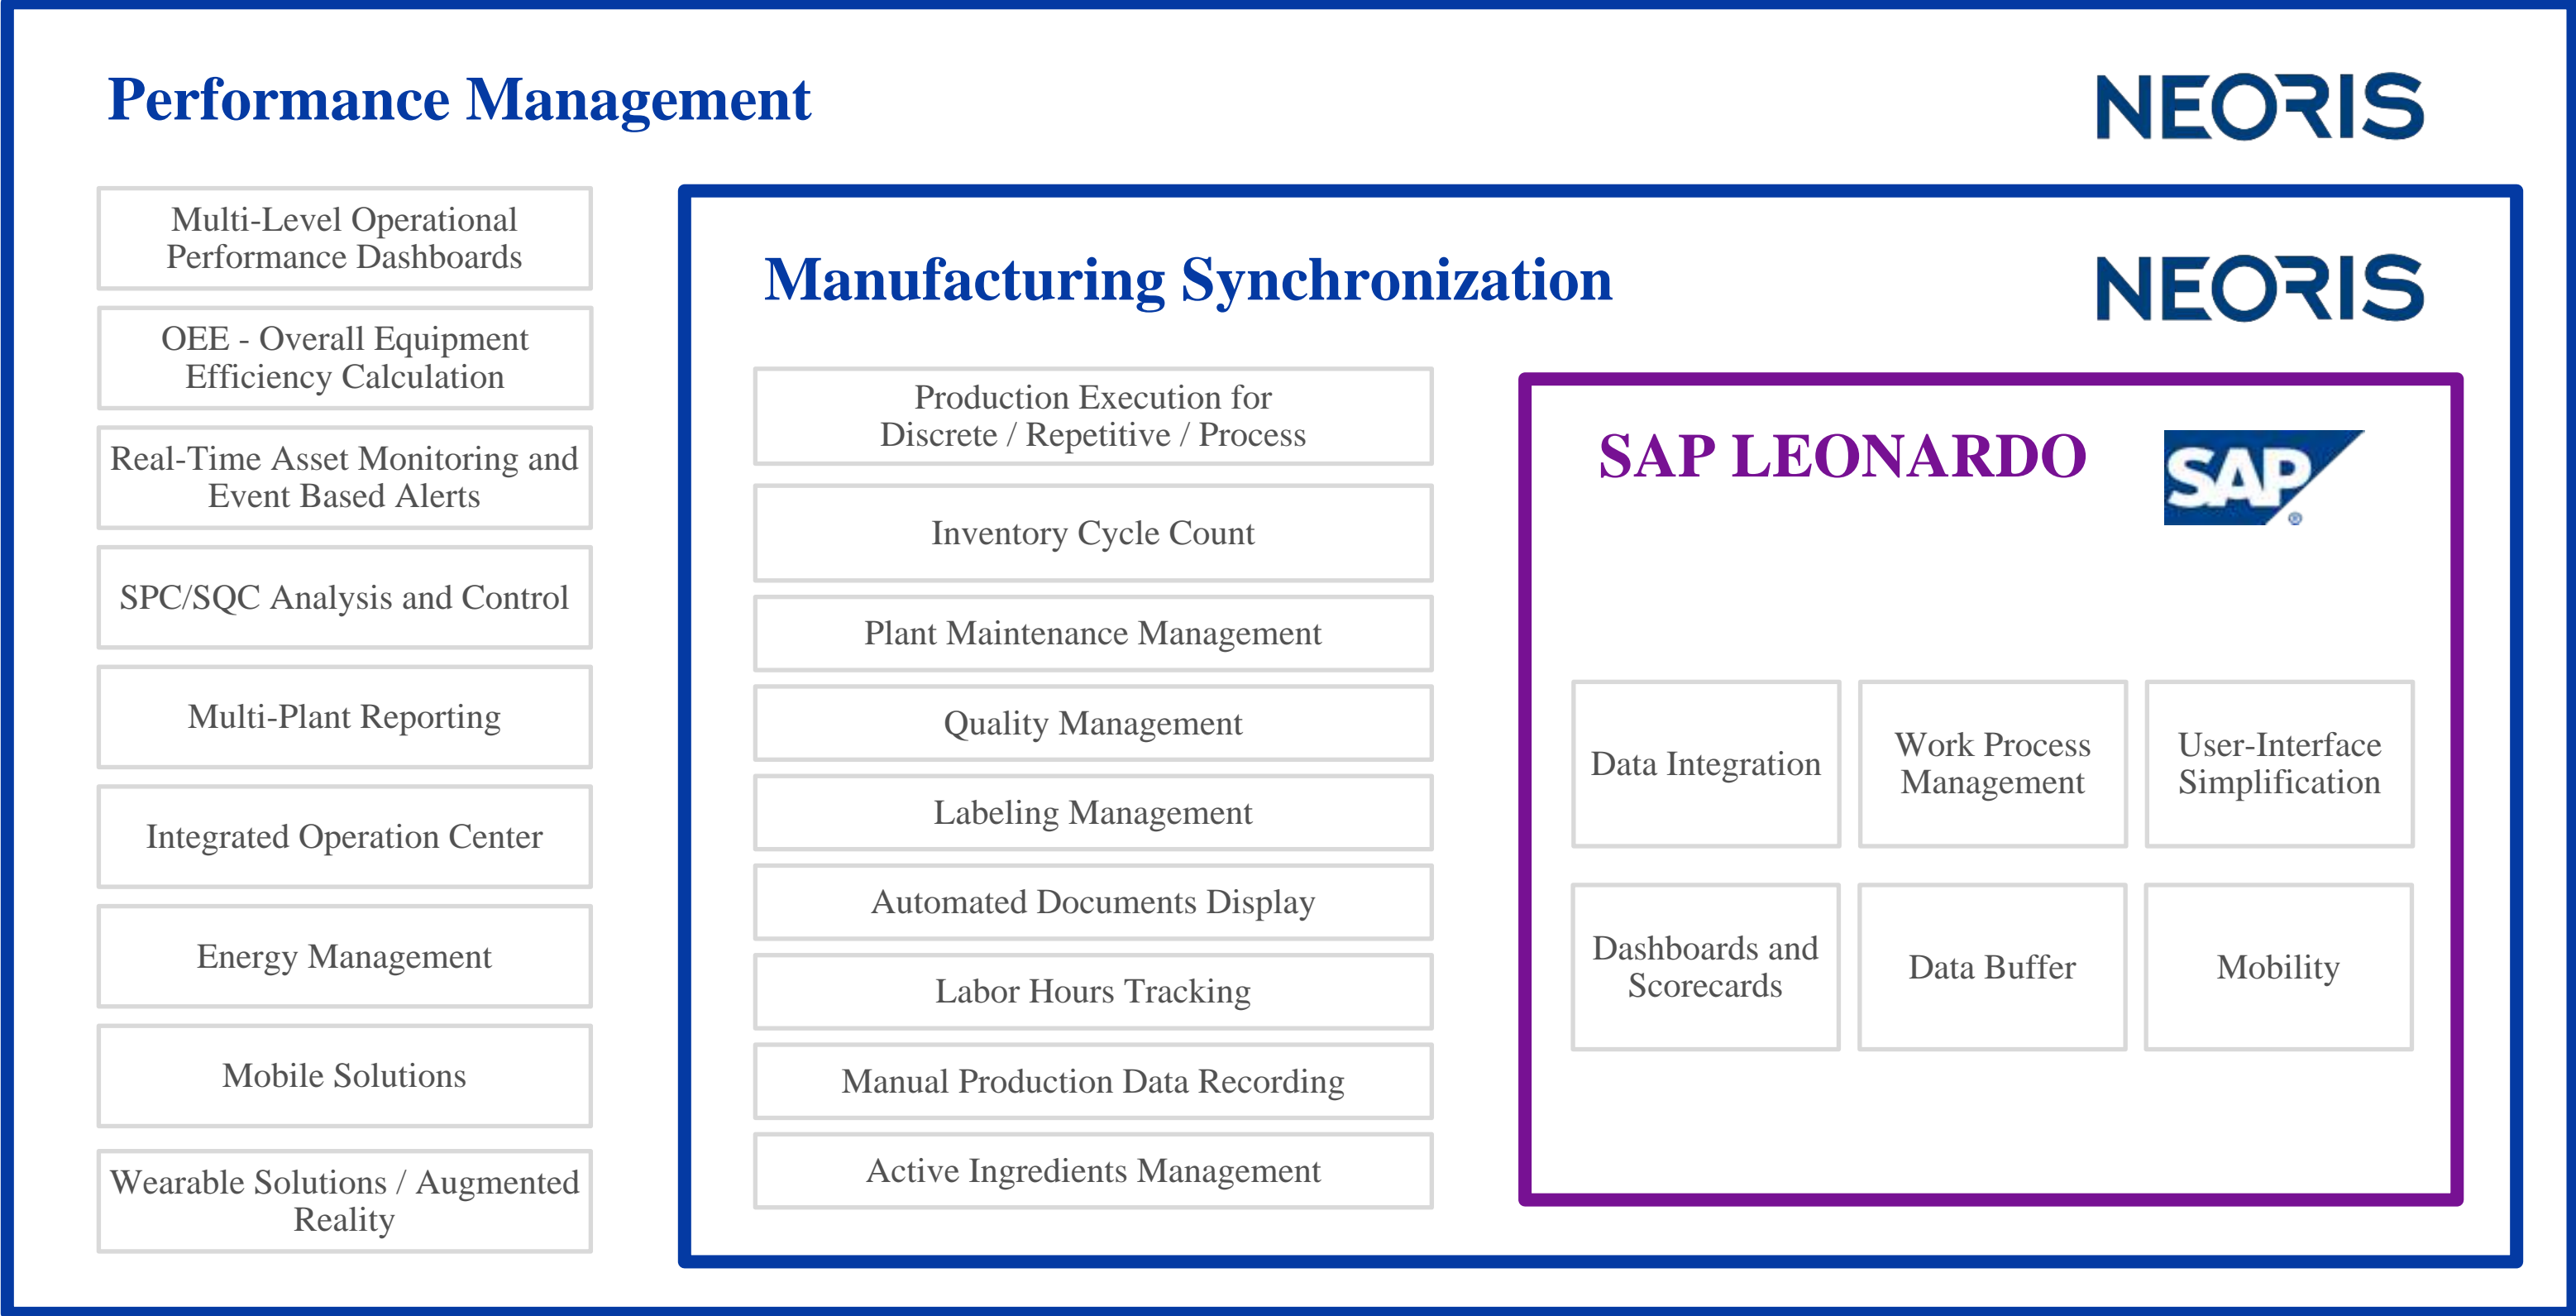

Blockchain services embedded into business applications

Cloud Platform

Foundation for SAP Leonardo

Our Manufacturing Assets Developed from NEORIS Argentina

- Discovery Workshops
- Custom Development
- Upgrades
- Project Quality Assurance
- Project Rescue (SWAT Team)
- Training
- AMS Support

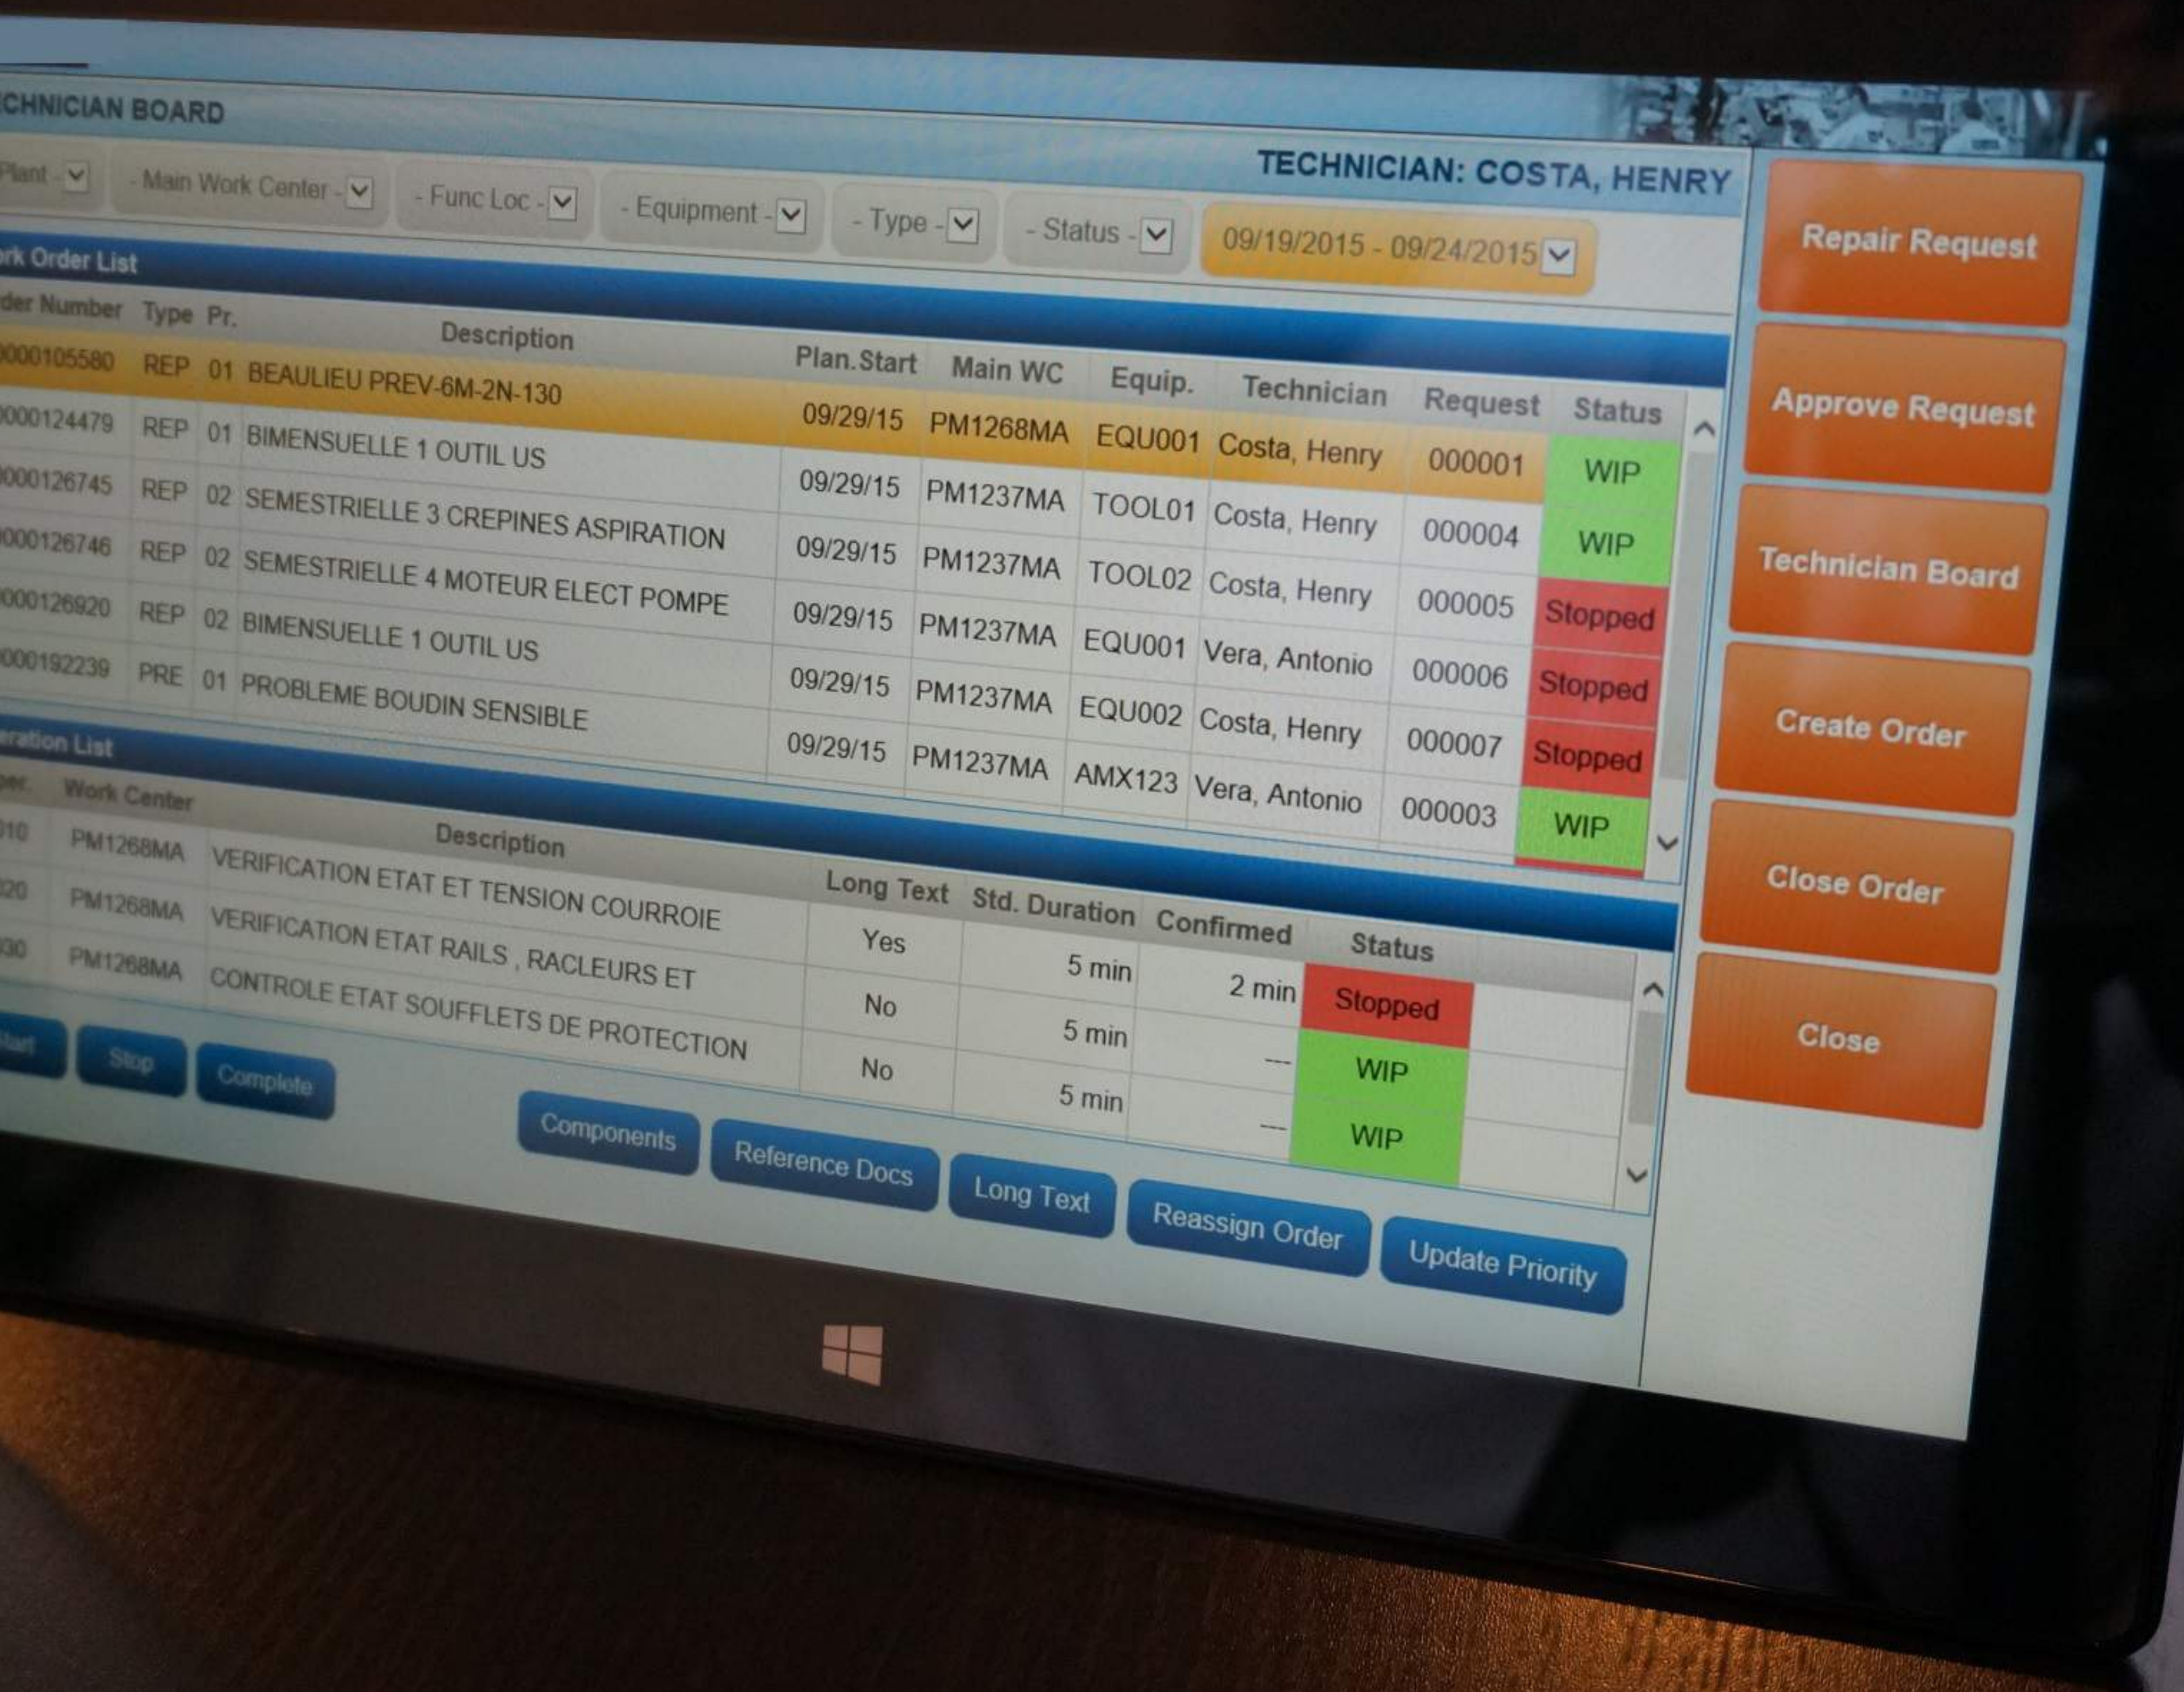

Technical Value
(SAP Solution)

Business Value
(NEORIS' Solution)

Plant Maintenance Management

- Improve overall availability and performance by standardizing and simplifying the plant maintenance processes.
- Improve labor efficiency by streamlining plant maintenance processes in the shop floor.
- Reduce plant maintenance activities time by creating simplified user-friendly screens.
- Keep track of maintenance tasks by employee.
- Accelerate the learning curve for personnel with a single simple to use application in the shop floor.
- Simplify the IT architecture by having a single SAP supported product to do quality data input, integration, and intelligence / analytics.

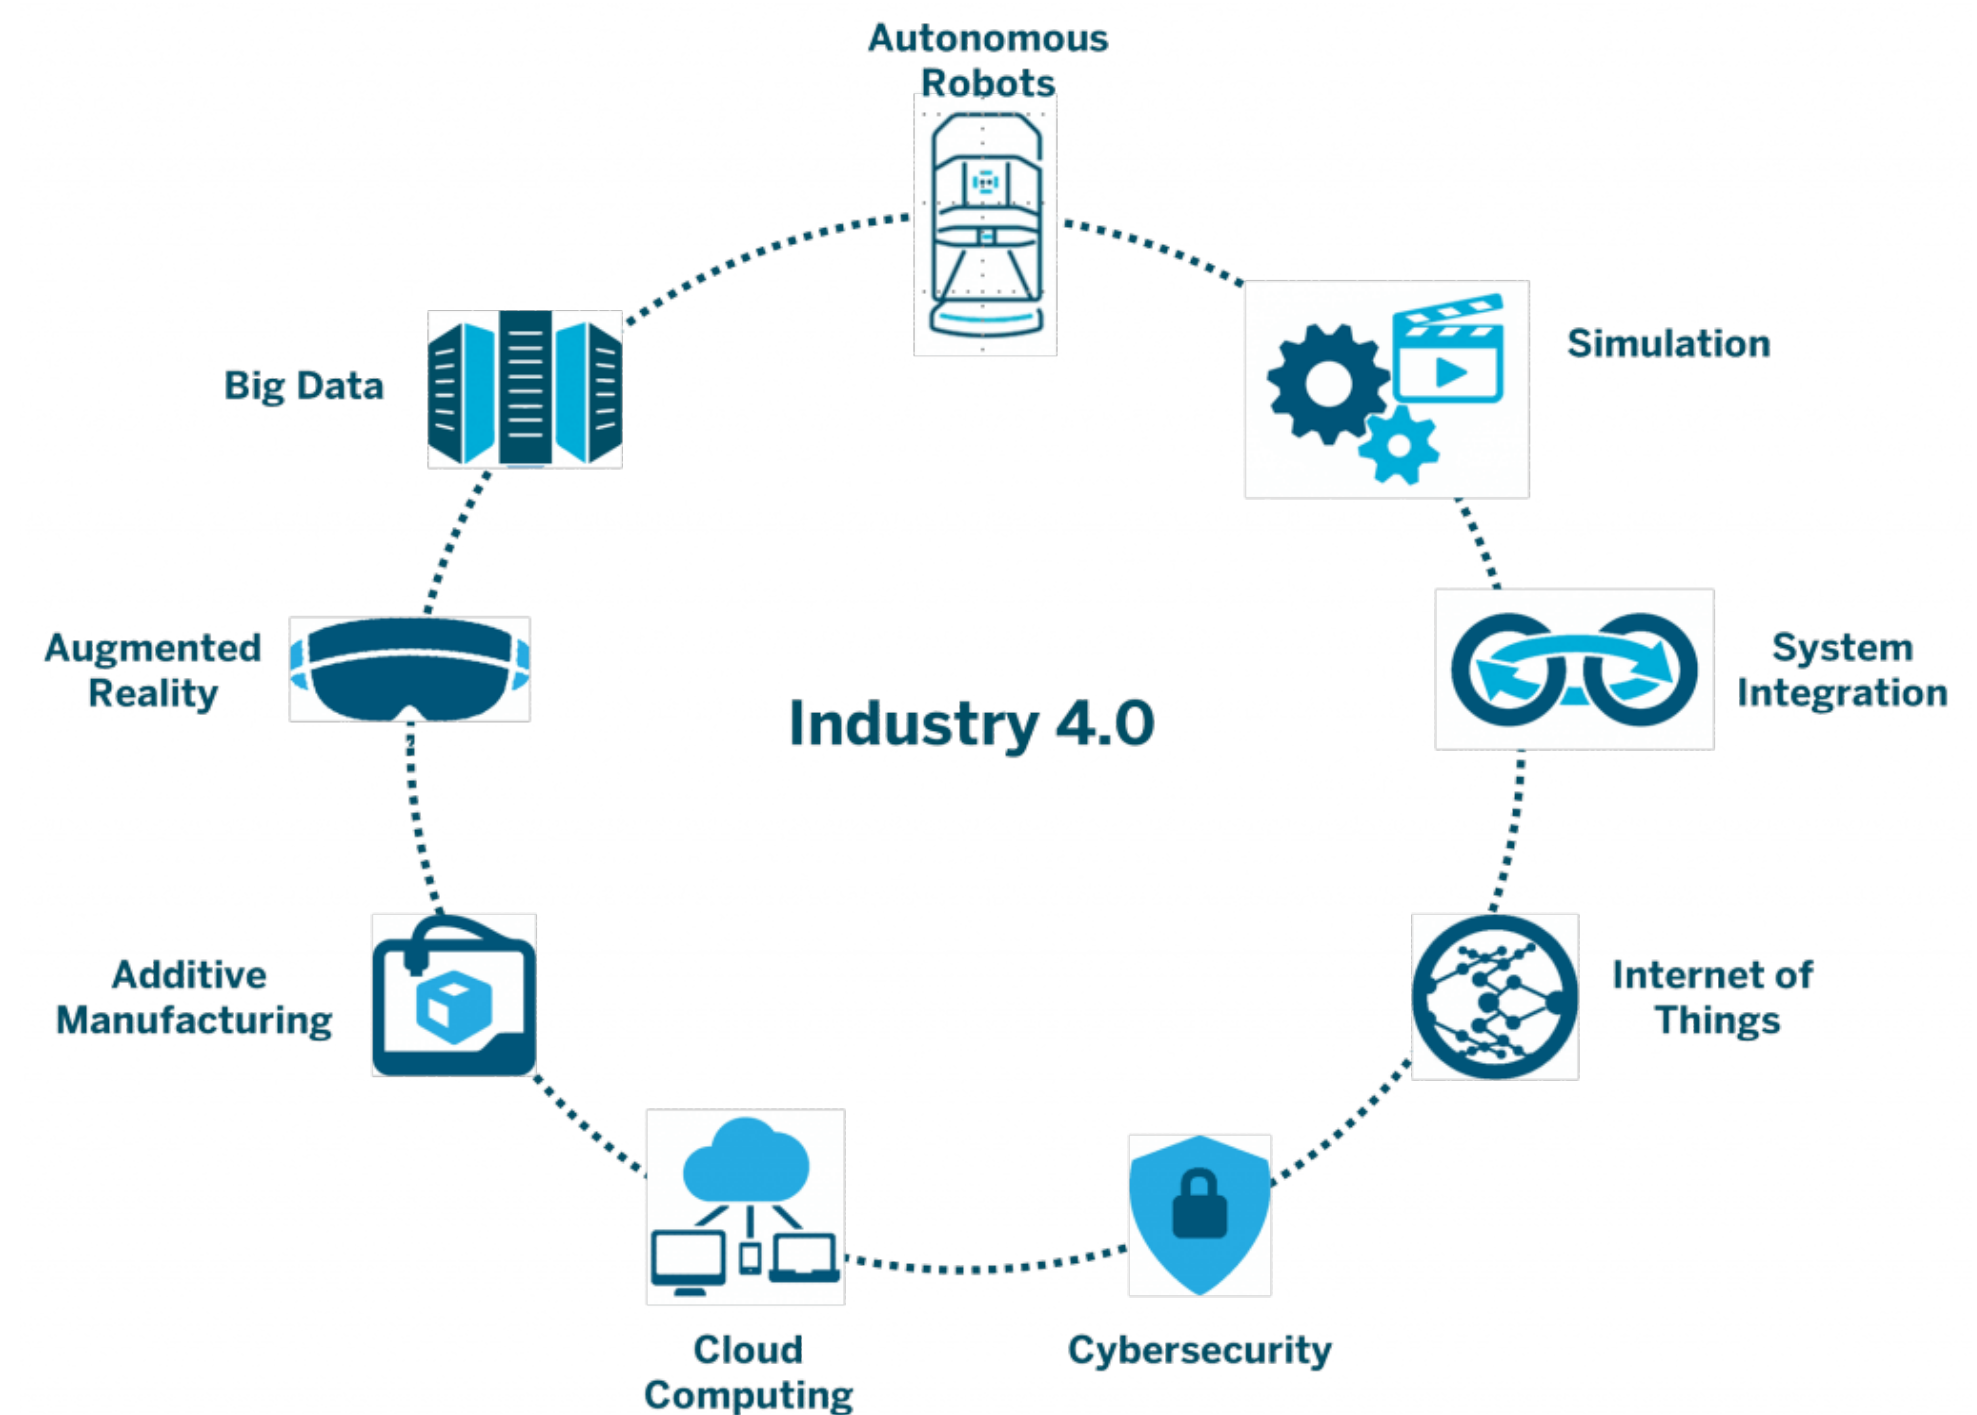

Integrated Operation Center

- NEORIS Video Wall provides an integrated view of information from various processes enhancing collaboration, visibility, and decision making
- Video Wall screen 43 feet wide by 6 feet high

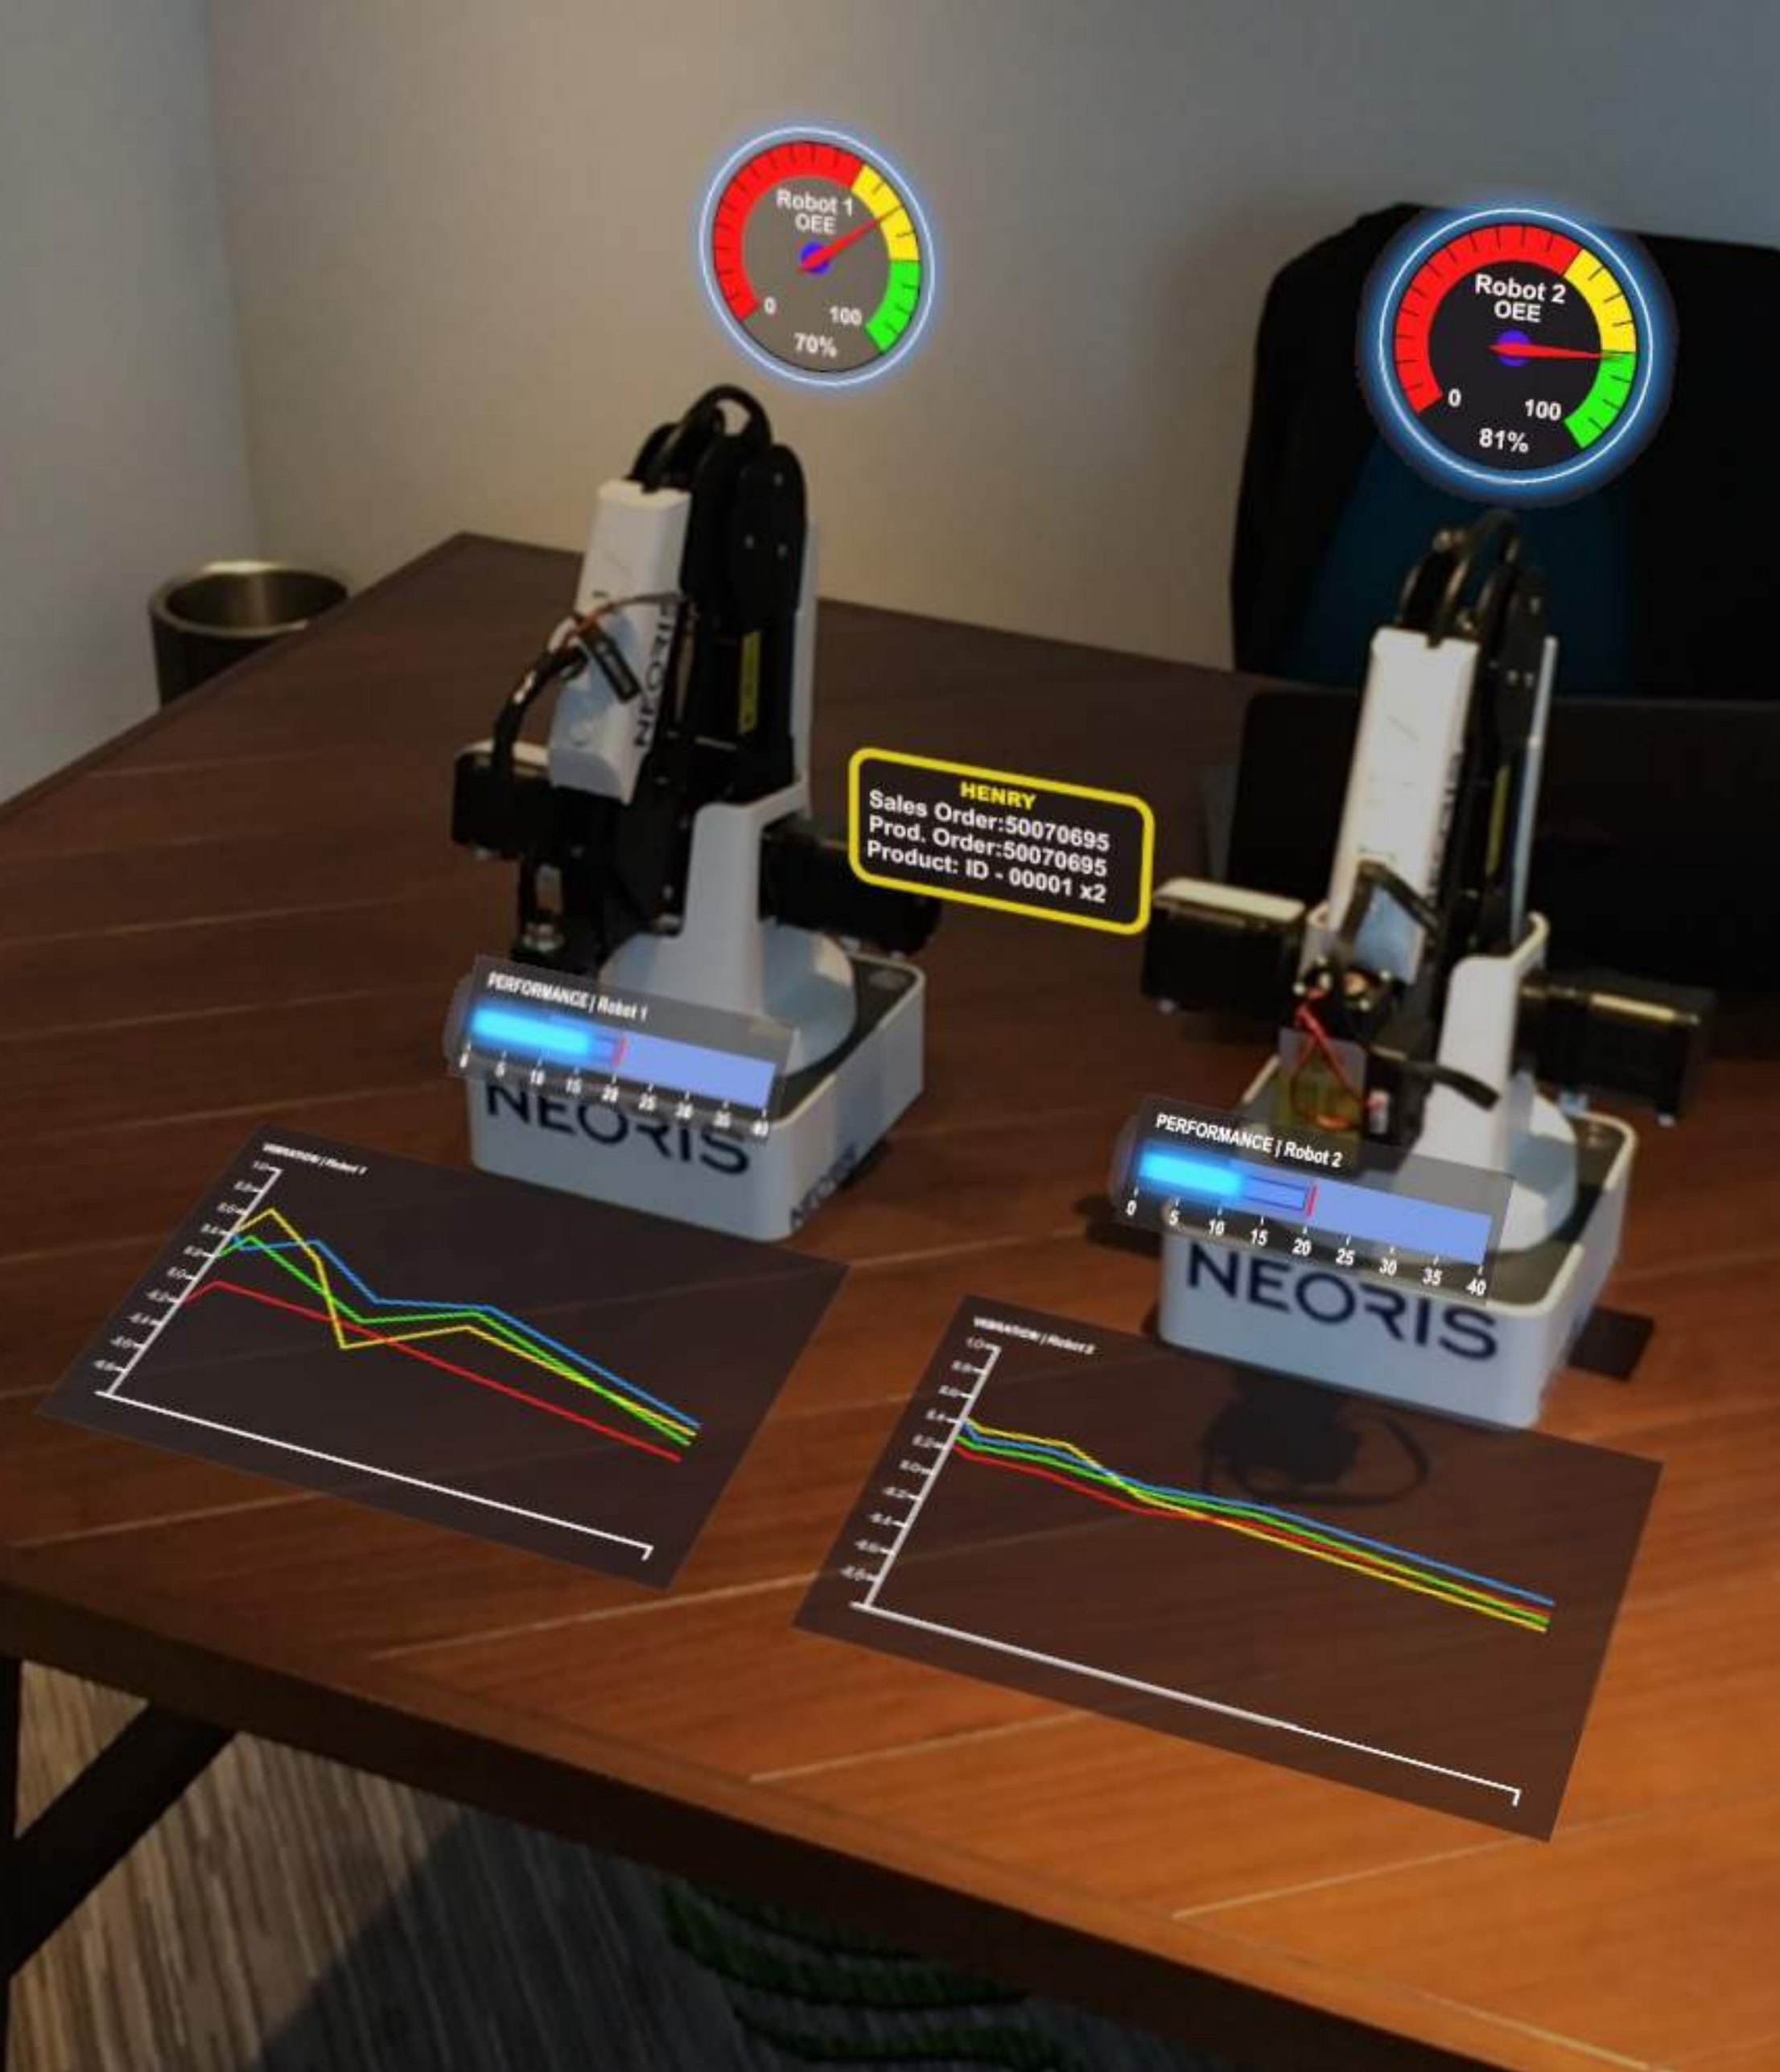

State of the Art Manufacturing

- Discrete Production Line with Robot Arms showing M2M communication, machine learning, remote operations, image recognition, predictive analytics, IoT and data acquisition simplification

Augmented Reality, Virtual Reality and Digital Twin

- Increase in customer satisfaction
- Reduction in manufacturing cycle times
- Reduction in defects, re-work
- Reduction in information delivery cost to employees
- Increase in productivity with hands free operations
- Eliminate manual errors
- Improve user experience and presentation of relevant information in real time
- Increase worker safety
- Enable remote training on manufacturing processes
- Improve utilization and performance

Our Value Proposition

Eliminate Unplanned Downtime

Increase Productivity

Minimize Costs

Enhance Customer Experience

Reduce Scrap

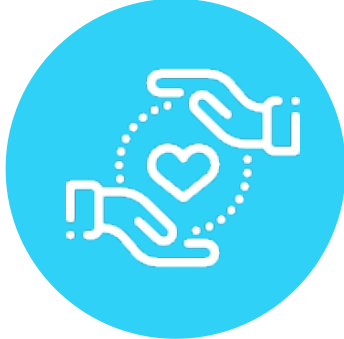

Boost Quality

Decrease Cycle Times

Optimize Performance

Improve Workplace Safety & Security
